Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY A:CHEMISTRY

Subject Index of Volume 104

Absorption
  solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
Absorption spectrum of titania
  relative photonic efficiencies and quantum yields in heterogeneous photocatalysis, 1
Acrylate films
  self-organization in dry photopolymerized acrylate films. 2. General experimental description, 213
Aminostyrylacridine
  deactivation of excited 4′-dialkylamino-9-styrylacridines, 69
ANS
  effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Anthracene
  gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromopyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25
Aza-aromatic compounds
  preparation and photoreaction of two-component molecular crystals between aza-aromatic compounds and *N*-phenylglycine, 105

Bacteriochlorophyll
  spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Binding
  effects of probe–amphiphile interaction on pyranine proton transfer reactions in lecithin vesicles, 165
9-Bromoanthracene
  primary process for the photochemistry of 9,10-dibromoanthracene yielding 9-bromoanthracene in cyclohexane–amine (triethylamine or *N*,*N*-dimethylaniline) studied by picosecond laser photolysis, 77
1-Bromopyrene
  gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromopyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25

C_{60}
  efficient photoinduced electron transfer between C_{60} and tetrathiafulvalenes studied by nanosecond laser photolysis, 59
2-Chloroethenylsilane
  visible luminescence study of the infrared multiphoton dissociation of 2-chloroethenylsilane, 19
Chlorophyll
  spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
  photocurrent kinetics (in the microsecond time range) of chlorophyll *a*, chlorophyll *b* and stilbazolium merocyanine solutions in a nematic liquid crystal located in an electrochemical cell, 133

Elsevier Science S.A.

Chlorophyll *a*
  quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141
Concentration effect
  quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141
Coumarin photochemistry
  photocycloaddition of angelicin and its thiinone analogue to 2,3-dimethylbut-2-ene, 83
CTAB
  effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Cyanine dye
  photophysics of a ''simple'' cyanide dye, 179
β-Cyclodextrin
  photochemistry of naproxen in the presence of β-cyclodextrin, 119
Cyclohexane–amine
  primary process for the photochemistry of 9,10-dibromoanthracene yielding 9-bromoanthracene in cyclohexane–amine (triethylamine or *N*,*N*-dimethylaniline) studied by picosecond laser photolysis, 77

Delayed luminescence
  spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Deuterium isotope effects
  deuterium isotope effects on the fluorescence of phenylpyridines, 65
Diarylethene
  photochromic reactions of a diarylethene derivative in polymer matrices, 203
9,10-Dibromoanthracene
  primary process for the photochemistry of 9,10-dibromoanthracene yielding 9-bromoanthracene in cyclohexane–amine (triethylamine or *N*,*N*-dimethylaniline) studied by picosecond laser photolysis, 77
DMPC lipsomes
  effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
DNA damage
  5-carboxy-2′-deoxyuridine, a new photooxidation product of thymidine, 97
DPH
  effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Droplet
  quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141

Electrochemical cell
  photocurrent kinetics (in the microsecond time range) of chlorophyll *a*, chlorophyll *b* and stilbazolium merocyanine solutions in a nematic liquid crystal located in an electrochemical cell, 133

Electron transfer
efficient photoinduced electron transfer between C_{60} and tetrathiafulvalenes studied by nanosecond laser photolysis, 59
Energy migration
quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141
Energy transfer
photochromic reactions of a diarylethene derivative in polymer matrices, 203
Ethyl cellulose
spectroscopic behaviour of 8-hydroxy-1,3,6-pyrenetrisulphonate immobilized in ethyl cellulose, 207
Excitation energy transfer
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Excited state protonation
deuterium isotope effects on the fluorescence of phenylpyridines, 65

Fluorescence kinetics
deactivation of excited 4′-dialkylamino-9-styrylacridines, 69
Fluorescence lifetime
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
Fluorescence probes
effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Fluorescence quantum yield
deuterium isotope effects on the fluorescence of phenylpyridines, 65
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
Fluorescence quenching by oxygen
quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141
Fluorescence spectrum
one-way cis → trans photoisomerization of azulenylethenes, 85

Gamma radiolysis
5-carboxy-2′-deoxyuridine, a new photooxidation product of thymidine, 97

Heterogeneous photocatalysis
relative photonic efficiencies and quantum yields in heterogeneous photocatalysis, 1
High-yield pulp
brightness reversion of mechanical pulps. VIII. Investigation of synergistic photostabilization methods for high-yield pulp, 217
Hot UV absorption spectroscopy
gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromopyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25
Hydrogen-bonding interaction
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
8-Hydroxy-1,3,6-pyrenetrisulphonate
spectroscopic behaviour of 8-hydroxy-1,3,6-pyrenetrisulphonate immobilized in ethyl cellulose, 207

Infrared multiphoton dissociation
visible luminescence study of the infrared multiphoton dissociation of 2-chloroethenylsilane, 19
Integrating sphere
relative photonic efficiencies and quantum yields in heterogeneous photocatalysis, 1
Intramolecular [4 + 2] cycloaddition
intramolecular [4 + 2] cycloaddition of a photogenerated *o*-quinone methide in aqueous solution, 91
Isomerization
one-way cis → trans photoisomerization of azulenylethenes, 85

Langmuir–Blodgett films
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Laser flash photolysis
reactions of α- and β-phenylalanines with transient Pt(III) complexes, 45
Laser photolysis
efficient photoinduced electron transfer between C_{60} and tetrathiafulvalenes studied by nanosecond laser photolysis, 59
Lecithin vesicles
effects of probe–amphiphile interaction on pyranine proton transfer reactions in lecithin vesicles, 165
Lipids
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Liquid crystal
photocurrent kinetics (in the microsecond time range) of chlorophyll *a*, chlorophyll *b* and stilbazolium merocyanine solutions in a nematic liquid crystal located in an electrochemical cell, 133
Luminescence
peculiarities of photochromic behaviour of spiropyrans and spirooxazines, 197
Luminescence quenching
size effects on the luminescence quenching of Tb^{3+} by Ru(II) tetraammines with alkyl *trans*-phosphane ligands, 39

Maleic anhydride
(2 + 2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53
Maleimide
(2 + 2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53
Merocyanine
photocurrent kinetics (in the microsecond time range) of chlorophyll *a*, chlorophyll *b* and stilbazolium merocyanine solutions in a nematic liquid crystal located in an electrochemical cell, 133

1-Naphthol
effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Naproxen
photochemistry of naproxen in the presence of β-cyclodextrin, 119
Nonradiative decay process
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
N-Phenylglycine
preparation and photoreaction of two-component molecular crystals between aza-aromatic compounds and *N*-phenylglycine, 105

One-photon reduction
one-photon reduction of Sm^{3+} to Sm, 35
Optical pH sensors
protonation of porphyrins in liquid PVC membranes: Effects of anionic additives and application to pH-sensing, 151
Optical probe
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
Oxetane benzophenone
(2 + 2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53

Oxidized nucleoside
5-carboxy-2′-deoxyuridine, a new photooxidation product of thymidine, 97

Phenol photodissociation
intramolecular [4 + 2] cycloaddition of a photogenerated *o*-quinone methide in aqueous solution, 91
Phenylalanine
reactions of α- and β-phenylalanines with transient Pt(III) complexes, 45
Phenylpyridine
deuterium isotope effects on the fluorescence of phenylpyridines, 65
pH jump
effects of probe–amphiphile interaction on pyranine proton transfer reactions in lecithin vesicles, 165
Photoacids
effects of probe–amphiphile interaction on pyranine proton transfer reactions in lecithin vesicles, 165
Photoacoustic spectra
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Photochemistry
photochemistry of naproxen in the presence of β-cyclodextrin, 119
Photochromism
peculiarities of photochromic behaviour of spiropyrans and spiro-oxazines, 197
photochromic reactions of a diarylethene derivative in polymer matrices, 203
Photocurrent
photocurrent kinetics (in the microsecond time range) of chlorophyll *a*, chlorophyll *b* and stilbazolium merocyanine solutions in a nematic liquid crystal located in an electrochemical cell, 133
Photocycloaddition
(2 + 2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53
Photodissociation
photodissociation dynamics of HNO_3 at 266 nm, 13
Photoisomerization
deactivation of excited 4′-dialkylamino-9-styrylacridines, 69
Photoisomerization of provitamin D
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
Photophysics
photophysics of a "simple" cyanide dye, 179
Photopolymerization
self-organization in dry photopolymerized acrylate films. 2. General experimental description, 213
Photoreaction kinetics simulation
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
Photoreduction
reactions of α- and β-phenylalanines with transient Pt(III) complexes, 45
Photoreduction of Sm^{3+}
one-photon reduction of Sm^{3+} to Sm, 35
Photoreduction yield
one-photon reduction of Sm^{3+} to Sm, 35
Photosensitation
5-carboxy-2′-deoxyuridine, a new photooxidation product of thymidine, 97
Photostabilize
brightness reversion of mechanical pulps. VIII. Investigation of synergistic photostabilization methods for high-yield pulp, 217
Picosecond laser photolysis
primary process for the photochemistry of 9,10-dibromoanthracene yielding 9-bromoanthracene in cyclohexane–amine (triethylamine or *N*,*N*-dimethylaniline) studied by picosecond laser photolysis, 77
pK_a values
protonation of porphyrins in liquid PVC membranes: Effects of anionic additives and application to pH-sensing, 151
Plasticized PVC membranes
protonation of porphyrins in liquid PVC membranes: Effects of anionic additives and application to pH-sensing, 151
Platinum complexes
reactions of α- and β-phenylalanines with transient Pt(III) complexes, 45
Porphyrins
investigation on the behavior of porphyrins at the surface of the colloidal silver particles, 159
Previtamin D conformational equilibrium
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
Prophyrins
protonation of porphyrins in liquid PVC membranes: Effects of anionic additives and application to pH-sensing, 151
Protonation
protonation of porphyrins in liquid PVC membranes: Effects of anionic additives and application to pH-sensing, 151
Pyranine
effects of probe–amphiphile interaction on pyranine proton transfer reactions in lecithin vesicles, 165
Pyrene
gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromo-pyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25

Quantum chain process
one-way cis → trans photoisomerization of azulenylethenes, 85
Quantum yield
relative photonic efficiencies and quantum yields in heterogeneous photocatalysis, 1
Quinone methide
intramolecular [4 + 2] cycloaddition of a photogenerated *o*-quinone methide in aqueous solution, 91

Radical scavenger
brightness reversion of mechanical pulps. VIII. Investigation of synergistic photostabilization methods for high-yield pulp, 217
Reaction centres
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Relative photonic efficiency
relative photonic efficiencies and quantum yields in heterogeneous photocatalysis, 1
Ruthenium complex
size effects on the luminescence quenching of Tb^{3+} by Ru(II) tetraammines with alkyl *trans*-phosphane ligands, 39

SDS
effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Selenophene
(2 + 2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53

Selenophthene
(2+2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53
Self-organization
self-organization in dry photopolymerized acrylate films. 2. General experimental description, 213
Sensitivity
photochromic reactions of a diarylethene derivative in polymer matrices, 203
Silver sol
investigation on the behavior of porphyrins at the surface of the colloidal silver particles, 159
Size effect
quenching of chlorophyll *a* fluorescence by oxygen in highly concentrated solutions and microdroplets, 141
Size effects
size effects on the luminescence quenching of Tb^{3+} by Ru(II) tetraammines with alkyl *trans*-phosphane ligands, 39
Solid state bimolecular photoreactions
preparation and photoreaction of two-component molecular crystals between aza-aromatic compounds and *N*-phenylglycine, 105
Solvatochromism
solvent-dependent photophysical properties of aminophenoxazone dyes as optical probes, 189
Solvent polarity effect
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
Spectrophotometric reaction control
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
Spectroscopic behaviour
spectroscopic behaviour of 8-hydroxy-1,3,6-pyrenetrisulphonate immobilized in ethyl cellulose, 207
Spironaphthooxazine
peculiarities of photochromic behaviour of spiropyrans and spirooxazines, 197
Spiropyran
peculiarities of photochromic behaviour of spiropyrans and spirooxazines, 197
Static fluorescence quenching
investigation on the behavior of porphyrins at the surface of the colloidal silver particles, 159
Surface enhanced Raman spectroscopy
investigation on the behavior of porphyrins at the surface of the colloidal silver particles, 159
Surface structure
self-organization in dry photopolymerized acrylate films. 2. General experimental description, 213
Surfactants
effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
Tellurophene
(2+2) photosensitized cycloadditions of maleic anhydride derivatives to selenophene and tellurophene derivatives, 53
Terbium ion
size effects on the luminescence quenching of Tb^{3+} by Ru(II) tetraammines with alkyl *trans*-phosphane ligands, 39
Tetrathiafulvalene
efficient photoinduced electron transfer between C_{60} and tetrathiafulvalenes studied by nanosecond laser photolysis, 59
Thiocoumarin photochemistry
photocycloaddition of angelicin and its thiinone analogue to 2,3-dimethylbut-2-ene, 83
Transient absorption spectrum of Sm^{2+}
one-photon reduction of Sm^{3+} to Sm, 35
1,2,4-Trichlorobenzene
gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromopyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25
Triton X-100
effect of ionic and neutral surfactants on the properties of phospholipid vesicles: investigation using fluorescent probes, 173
T–T absorption
one-way cis → trans photoisomerization of azulenylethenes, 85
Two-component molecular crystals
preparation and photoreaction of two-component molecular crystals between aza-aromatic compounds and *N*-phenylglycine, 105

UV irradiation
self-organization in dry photopolymerized acrylate films. 2. General experimental description, 213
UV screens
brightness reversion of mechanical pulps. VIII. Investigation of synergistic photostabilization methods for high-yield pulp, 217

Vector correlations
photodissociation dynamics of HNO_3 at 266 nm, 13
Vesicles
spectral properties of the photosynthetic reaction units reconstituted from bacterial reaction centres and antenna pigments located in liposomes suspended in buffer or ordered in Langmuir–Blodgett films, 123
Visible luminescence
visible luminescence study of the infrared multiphoton dissociation of 2-chloroethenylsilane, 19

Xanthone
gas-phase UV spectroscopy of anthracene, xanthone, pyrene, 1-bromopyrene and 1,2,4-trichlorobenzene at elevated temperatures, 25

Z/E photoisomerization quantum yield
solvent effect on previtamin D conformational equilibrium and photoreactions, 113
